- Créativité, Adaptabilité
- JavaScript (ReactJs)
- PHP (Laravel)
- MySQL, MongoDB
- HTML5, CSS, Bootstrap
- un peu de NodeJs (ExpressJs)
- un peu de Python

LANGUAGES

- Anglais : Fluent
- Français : Intermediate
- Arabe : Native

Lamchiyakh Mohammed

Web Developer

EXPERIENCE

Full Stack Developer | NEUROBASE

Dec 2024 - Present

- Development of new features for the platform.
- Optimization of the platform.
- Implementation of responsive user interfaces.
- Creation of AI Assistants and AI Agents.
- Prompt optimization.

Full Stack Developer | SCREENDAY

Oct - Dec 2024

- Development of new features for a school platform using Laravel.
- Creation of RESTful APIs for the mobile version.
- Implementation of responsive user interfaces with Blade and Bootstrap.
- Backend extension to support new mobile features.
- Database query optimization to improve performance.

Développeur Web | CHU

March 2024

- Built a system that schedules appointments by checking doctors' availability by specialty.
- Validated patient information from received emails.
- Sent automatic appointment confirmation notifications.
- Ensured efficient management of doctors' schedules and availability using advanced validation mechanisms.

PROJECTS

Clinic Management System

Technologies: Laravel (PHP), Blade (HTML5), MySQL, Laravel Sanctum, CSS, Bootstrap
A clinic management system that allows appointment scheduling via email based on medical specialty. Automatic validation of information with error notifications. Administrators validate requests, create patient files, and assign available doctors. Two roles exist: administrator (full access) and doctor (limited access). Ensures optimal organization of consultations.

Hotel & Restaurant Management System

Technologies: ReactJs (JavaScript), Laravel (PHP), MySQL, CSS, Bootstrap
A React/Laravel web application with three-level authentication: user (room reservations and restaurant orders), hotelAdmin (room & reservation management), and restoAdmin (restaurant order management). Users can manage reservations through a dedicated interface.

E-commerce Website

Technologies: Laravel (PHP), Livewire, Filament, MySQL, Tailwind
A Laravel/Livewire e-commerce platform with an interactive user interface and an admin panel powered by Filament. Customers can create accounts, buy products, manage their cart, and track orders. Admin can manage products, categories, orders, and users.
