PROFESSIONAL SUMMARY

Backend & AI-focused Full-Stack Developer with hands-on experience building scalable SaaS applications, REST APIs, AI assistants, and automation systems. Specialized in Symfony, Laravel, Node.js, React, and AI-powered workflows including RAG pipelines and LLM integrations. Experienced in optimizing backend performance, designing secure authentication systems, and building production-ready business platforms.

KEY ACHIEVEMENTS

- Improved backend performance by approximately 20–30% through database optimization and efficient data handling
- Reduced application load times by nearly 50%, improving responsiveness and user engagement
- Built and deployed multiple full-stack applications across healthcare, e-commerce, and management sectors
- Developed AI assistants and RAG-based workflows reducing manual operations and accelerating internal processes
- Designed RESTful APIs supporting both web and mobile integrations
- Implemented secure multi-role authentication systems with scalable permissions management

TECHNICAL SKILLS

Frontend	React, Next.js, TypeScript, Redux Toolkit, RTK Query, Tailwind, Bootstrap
Backend	Symfony, Laravel, Node.js, NestJS, Express, REST APIs, SSE
AI & Automation	AI Assistants, RAG Pipelines, LLM APIs, Prompt Engineering, N8N
Databases	MySQL, PostgreSQL, MongoDB, Supabase
Security	JWT, 2FA, Keycloak
Tools	Git, Filament, Livewire
Languages	Arabic (Native), English (Fluent), French (Fluent)

WORK EXPERIENCE

Full-Stack Developer — Neurobase | Dec 2024 – Aug 2026 | Remote

- Contributed to SaaS platform development using Symfony, React, APIs, and AI tooling
- Designed and integrated RESTful APIs supporting frontend and internal systems

- Optimized backend logic and database performance
- Built AI assistants and automation workflows improving operational efficiency
- Enhanced frontend responsiveness and usability

Full-Stack Developer — Screenday | Oct 2024 – Dec 2024

- Developed backend APIs and business features for a school management platform
- Implemented mobile integration APIs and optimized database queries
- Built responsive frontend interfaces and improved system responsiveness

Web Developer — CHU | March 2024

- Built a medical appointment management system based on doctor availability
- Automated scheduling and patient data validation
- Implemented notification workflows improving operational efficiency

PROJECTS

Clinic Management System

Tech: Laravel, MySQL, Blade, Bootstrap

- Developed a system for managing medical appointments and patient records
- Implemented role-based access (Admin / Doctor)
- Automated scheduling and validation workflows
- Improved organization of consultations and patient management

Hotel & Restaurant Management System

Tech: React, Laravel, MySQL

- Built a full-stack application with multi-role authentication (User, Hotel Admin, Restaurant Admin)
- Developed reservation and order management features
- Designed backend APIs to handle business logic and data flow
- Created dynamic frontend interfaces using React

E-commerce Platform

Tech: Laravel, Livewire, Filament, MySQL, Tailwind

- Developed a full e-commerce platform with admin dashboard
- Implemented cart, order tracking, and product management
- Built dynamic UI using Livewire
- Managed full CRUD operations for products, users, and orders

EDUCATION

DTS in Full Stack Web Development

Institut Spécialisé de Technologie Appliquée Al Adarissa — Fes, Morocco

2022 – 2024

CERTIFICATIONS

- Advanced React — Meta
- JavaScript Essentials 1 & 2 — Cisco Networking Academy
- Introduction to Cybersecurity — IBM (Coursera)
- Mastering Laravel Framework and PHP — Board Infinity
